Thomas Arnold

Historia, essays, and sermons
1827-1842 Head of Rugby school

1838-1843 - History of Rome (3 vol)

1842

Church of the Madeleine
Began in Paris under Louis XV
but not completed until 1842.
Work on it was delayed by the
Revolution

1842

Austrian physicist Christian
DOPPLER proposed what became
known as the DOPPLER effect, which
is the change in the frequency
of waves emitted by an object
in motion. The faster an object
moves, the more the waves in front
of it are compressed & the more those
behind are stretched. If you know

the natural frequency at which light
or sound waves are emitted by an
object, but you note a different value
when the object is moving, the difference
between the two frequencies is a
direct indication of the object's speed
toward you or away from you.

Sept 1842

Archive War

Armed force sent by Pres.

Samuel Houston (Mar. 2, 1793 - July 26, 1863) failed to move government Archives from Austin to Houston thus keeping Austin as permanent Capital of Texas.
